The Real Reese's Egg Prices are too High

Baker Center has released the results of a new price-goods study by Howard H. Baker Jr. Center for Public Policy director Dr. K. Christine Cowley. The study found that the price of Reese's Eggs at stores across the country is higher than what consumers are willing to pay. The study was conducted by a team of economists and ecologists who sought to quantify the benefits of water quality improvements across a large part of the country.

Impact of School Superintendent Turnover

A new analysis of data collected as part of the Tennessee Pulse Survey, a retrospective study, which has been accepted for publication in the journal Education and Urban Society, explores the importance of school district superintendents across states.

Global Security

A new study, "Territorial and Maritime Disputes: How the Goals of States who Engage in Territorial and Maritime Disputes are to Reduce Uncertainty and Win in Negotiations, Mediation, or Arbitration," has been published by Baker affiliate Professor of Political Science and Global Security, Dr. Christopher D. Mankin.

Economic and Environment

Beneath the Surface: Beneath the Surface

The analysis of data collected as part of the Tennessee Pulse Survey, a retrospective study, which has been accepted for publication in the journal Education and Urban Society, explores the importance of school district superintendents across states.

Student Spotlight

Sophia Milen is a sophomore student at the Baker Center for Public Policy. She is a student ambassador and student worker. She is originally from Cleveland, Tennessee, and is a College Scholar, with a concentration in Global Security. She recently published her most recent book, "The Benefits of Water Quality Improvements in Lakes, Rivers, and Streams: How the Goals of States who Engage in Territorial and Maritime Disputes are to Reduce Uncertainty and Win in Negotiations, Mediation, or Arbitration," with the Center for Energy, Environment, and Economic Growth.
